INTERNSHIP EXPERIENCES

VR/AR & Gaming — Game Development Intern Allreal : Developed immersive VR/AR experiences using Unity, implementing interactive gameplay mechanics, 3D environments, player interactions, and real-time game logic to create engaging gaming experiences.	2026
Better Tomorrow : Designed, developed, and deployed full-stack MERN applications leveraging AWS services. Architected RESTful APIs, implemented authentication mechanisms, and optimized database interactions.	2025

PROJECTS

WealthMind – AI-Powered Personal Finance Platform	Github	July 2026
Built an AI-driven financial management platform for budgeting, expense tracking, fraud detection, financial-health scoring, savings planning, and personalized financial insights. Developed a multi-agent AI advisor that analyzes user queries and provides context-aware financial recommendations through a React chat interface ,REST APIs.		
Tech Stack: React JS TypeScript Python FastAPI SQLAlchemy SQLite/PostgreSQL AI/LLM		
IoT-Based Smart Washing Machine Monitoring & Control System	Github	March 2026
Developed an IoT-enabled system to monitor and control a washing machine remotely using a web application. The ESP32 sends real-time data to a MERN stack-based web interface, allowing users to track cycle status.		
Tech stack: React JS Node JS MongoDB Express C++		
Components : ESP32 RFID Reader Relay Buzzer LCD		
Employee Management System	Github	December 2025
Developed a full-stack Employee Management System to streamline employee data handling, attendance tracking & administrative operations. Built a responsive frontend using React and a RESTful backend using Node.js and Express, with MongoDB for efficient data storage.		
Tech stack: React JS Node JS Express JS MongoDB
